- Source reported from his own observations that the Soviet Control Commission (BKK) can approach offices of the Soviet Zone German Government only via the minister in charge.
- In December 1949 Selbmann, Minister of Industry, issued a directive to the Chemistry Department that no statistics be given to the SKK without his sanction. The SKK, however, still tries to exercise immediate influence by requesting from offices and enterprises data which are then delivered despite the prohibition.
- A Col Bakin and First Engineer Kalinin, his deputy, both at the Karlshorst high School, are the SKK officers in charge of the Chemistry Department. They pretend to have no knowledge of the German language.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States. Next Review Date: 2008
